# Zaakpay SMS flow -User Document

---

VERSION 1.0

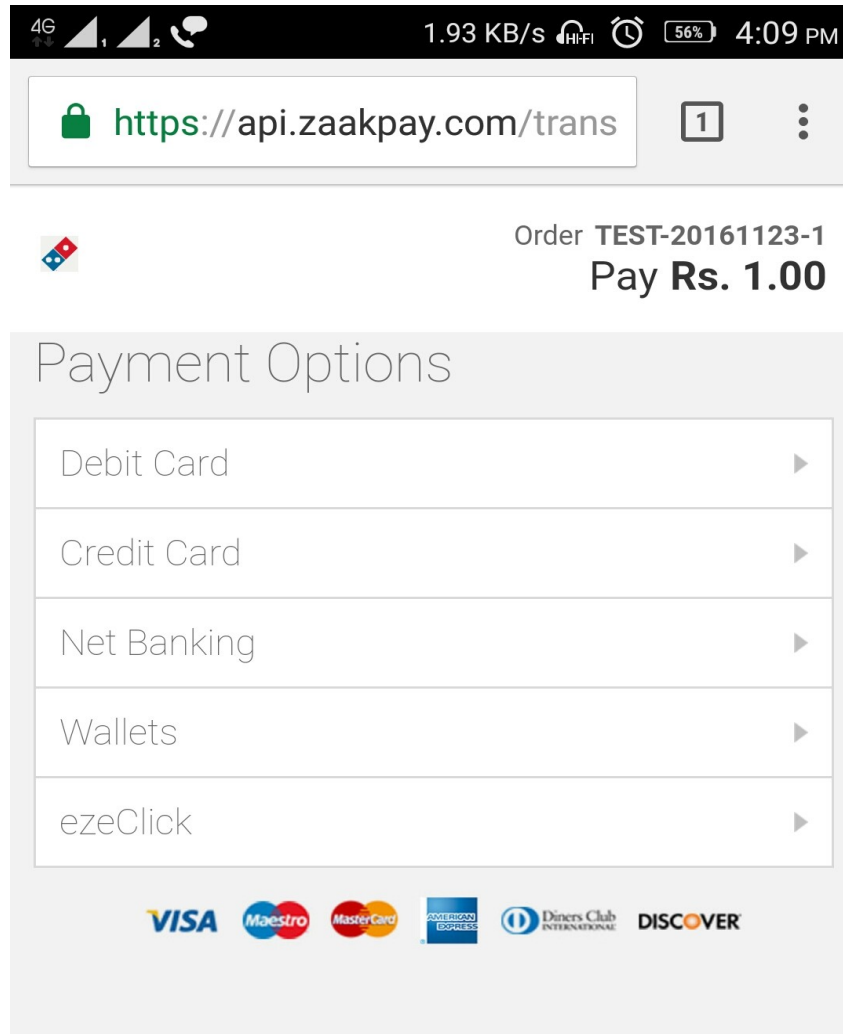

## 1 Payment SMS

- Customer shares a cell number with the store vendor.
- Customer then receives an SMS with a payment link.
- The link will redirect the customer to the payment gateway.

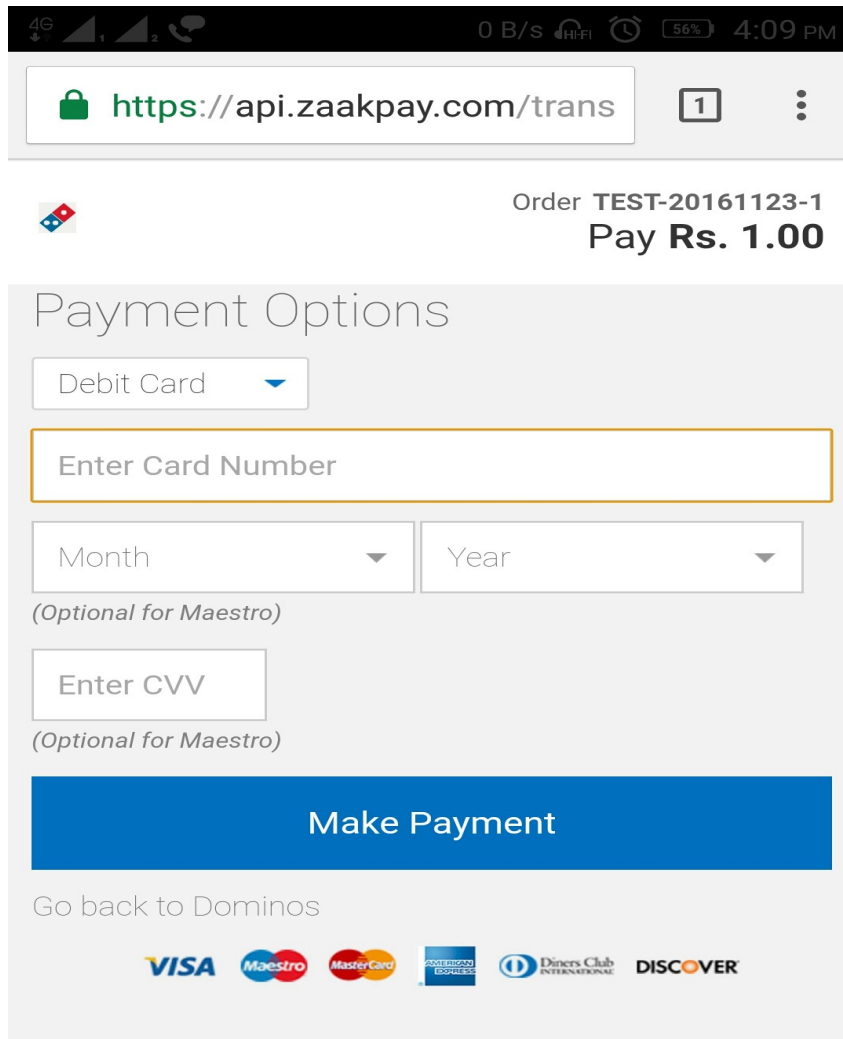

## 2 Payment Page

The user gets various payment options to complete the payment.

On selecting an option (in the below example, it is a debit card) the card page will appear.

The screenshot shows a mobile browser interface. At the top, the status bar displays 4G, signal strength, 0 B/s, Hi-Fi, a clock icon, 56% battery, and 4:09 PM. The address bar shows a lock icon, the URL <https://api.zaaipay.com/trans>, a tab count of 1, and a menu icon. Below the address bar, the page header includes the Zaaipay logo and the text "Order TEST-20161123-1" and "Pay Rs. 1.00". The main section is titled "Payment Options" and contains a dropdown menu set to "Debit Card". Below this is a large input field for "Enter Card Number". Underneath are two dropdown menus for "Month" and "Year". A note "(Optional for Maestro)" is positioned below the month/year fields. Further down is an input field for "Enter CVV", also with a note "(Optional for Maestro)". A prominent blue button labeled "Make Payment" is centered below the CVV field. At the bottom, there is a link "Go back to Dominos" and a row of payment logos: VISA, Maestro, MasterCard, AMERICAN EXPRESS, Diners Club INTERNATIONAL, and DISCOVER.
